PROFILE

GenAI Developer with hands-on experience building production-ready AI applications using LLMs, Python, Azure OpenAI, and RAG. Skilled in developing enterprise AI solutions, AI guardrails, semantic search, real-time meeting interpreters, and scalable AI APIs.

EXPERIENCE

Prodapt | Guindy, Chennai | GenAI Developer Intern Dec 2025 – Present

- Language Translator Widget** — Built in-place translation widget using Python to extract text from audio and text files; integrated **Gemma** and **Azure Translator** backends for multi-format document translation.
- Invoice Extractor** — Parsed multi-format PDF invoices; mapped extracted fields to **SAP schema** and auto-populated into Excel for client workflows.
- Talent Match Assistant** — Designed **Neo4j graph DB** schema mapping candidate skills to JDs via Cypher queries; implemented LLM-based interview question generation from resumes.
- PII Masker Widget** — Combined **Presidio**, **spaCy NER**, and regex to detect and redact PII across document types.
- ML-Based Guardrails** — Applied **reinforcement learning** and embeddings to detect toxic content; implemented fallback guardrails over LlamaGuard-based pipelines.
- Real-Time Meeting Interpreter** — Integrated **WebSockets** with **OpenAI** and **Azure Speech**; built **React** frontend; enabled live transcription, web/screen sharing, and meeting bot.
- Advance Test Case Generator** — Built a **WebSocket**-based live streaming pipeline with **LangChain** to generate classifiable test cases from uploaded docs/user stories, with on-demand test data for exploratory testing.
- Token Optimizer** — Built an LLM gateway wrapper using an **SLM** to route queries to the lowest-cost capable model, with prompt optimization and response caching to cut token consumption and reduce overall LLM API costs.

Infosys Springboard | Virtual | Machine Learning Intern Dec 2025 – Mar 2026

- Built IPL match win prediction using **XGBoost** on historical datasets; feature-engineered run rate, strike rate, and wickets; saved deployment-ready models.

Altrocks Tech | Chennai | Software Developer Intern Feb 2024

- Contributed to front-end and back-end tasks using **Java** and **HTML**; gained foundational full-stack web development experience.

Evolve Robot Lab | Chennai | Junior Research Fellow Jan – Feb 2024

- Designed and simulated robotic circuits with **Tinkercad** and **Arduino** for real-time embedded control, emphasising sensor integration and microcontroller programming.

PROJECTS

Smart IoT Dustbin for Automated Waste Segregation | *ESP32-CAM, Roboflow, Python, IoT*

- Built a ₹5,000 smart dustbin using ESP32-CAM and Roboflow-trained ML model (92% accuracy); achieved 100% hands-free disposal and ~60% reduction in manual segregation time.

Defect Classification of Bearings using CNN | *PyTorch, CNN, Computer Vision*

- Achieved 95%+ accuracy in real-time bearing defect classification; improved predictive maintenance efficiency by 30% and reduced machine downtime by 20%.

Business Performance Dashboard | *Power BI, DAX, Data Modeling*

- Unified product, customer, and regional dashboards into a single Power BI executive view; improved decision-making efficiency by 35%.

EDUCATION

Rajalakshmi Engineering College | **B.E Mechatronics Engineering** CGPA: 9.3 | 2022 – 2026

Coursework: Machine Learning, Embedded Systems, Robotics, IoT, Control Systems, Python Programming

HSC — Velammal Matriculation Hr. Sec. School 89.66% | 2022

SSLC — St. Mary's Matriculation Girls Hr. Sec. School 93.66% | 2020

SKILLS

Technical: Python, Generative AI, LLMs, Prompt Engineering, LangChain, Hugging Face Transformers, FastAPI, REST APIs, Vector Databases, Neo4j, NumPy, Pandas, Git, Power BI

Soft Skills: Problem Solving, Teamwork, Time Management

CERTIFICATIONS

NPTEL: Entrepreneurship Essentials, Social Innovation in Industry 4.0, Introduction to IoT, Understanding Incubation and Entrepreneurship, Work System and Design.

LinkedIn: Learning Python, Machine Learning with Python, Applied Machine Learning Algorithms, Full Stack Web Development, Java Algorithms, Learning MATLAB.

TVS Training: Data Analytics in Microsoft and Power BI. **Coursera:** AI for Everyone.

HACKATHONS & ACHIEVEMENTS

- 1st Prize** — 24-Hour Hackathon, VIT Chennai (AR & VR)
- 1st Prize** with Dr. Srinivasan Award — 36-Hour Hackathon "XYNTHRA'25" (Top 33/250+)
- Best Innovation Award** — 33-Hour Hackathon, Dept. of Mechanical Engg, REC
- Special Prize** — Women's Hackathon by TANCAM
- Best Cadet in Semaphore** — NCC Residential Camp
- 3rd Prize** — Project Expo, Devs Club REC
- Top 45 teams** from 250+ — Smart India Hackathon selection
- Recognised **Top Performer** in department — 6 consecutive semesters
- 2nd Prize** — Dept. IPC, Dr. A.P.J. Abdul Kalam Award
- Runner-Up** — F-ZONAL Basketball Tournament

MEMBERSHIP & ROLES

Content Secretary, COSMO Club, REC — Leading event content creation and team coordination. (2025 – 2026)

Content Vice Secretary, COSMO Club, REC — Assisted in content planning and coordination for events. (2024 – 2025)

Class Representative, REC — Bridge between students and faculty for communication and coordination. (2022 – 2026)

Chairperson, IEEE RAS, REC — Led robotics events and team planning. (2023 – 2024)
